Customer Pick Up

Ship to: _____

Due to continually evolving product and installation codes and variations in codes among jurisdictions, certain standard features and product options may not apply to every order. SHC's authorized dealers are required to ensure that installation of each elevator complies with all local regulations and code requirements governing the installation and use of elevators for the municipality in which they are installed. Crest strongly recommends that customers consult with their local authority to ensure that their elevator features and the installation of their elevator meets all regulations and code requirements for their jurisdiction.
